

# Albemarle Graphics Ltd

has been designing, producing and installing signs, graphics and displays for over 40 years, and we would like to introduce ourselves to you here with some examples of our work.

## Large format digital printing

We use the latest Mimaki ink technology to produce high quality prints suitable for interior and exterior application.

# Self adhesive vinyl graphics

Pre-spaced lettering, logos, exhibition text, vehicle livery; the uses for vinyl are almost endless. We can supply and fit all your vinyl needs, and have gained a reputation as one of the leading gallery wayfinding suppliers.

Palace Theatre, London. All LED Illumination

## Illuminated signs and neon

Flexface box signs are made-to-measure up to almost any size. Neon is especially bright and often positioned where high visibility or a retro look is required, but nowadays LEDs are fast becoming the standard.

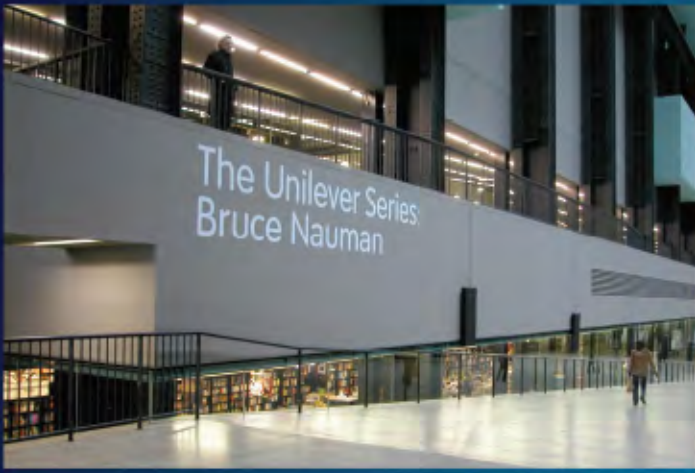

## Shopfronts and interiors

A massive range of internal and external sign systems and types are available, so whether you are looking for a traditional or modern style, we can help you achieve the look you want.

# ALBEMARLE GRAPHICS LTD
